

Daniel Jaramillo Bustamante

Frontend Tech Lead | AI-Native Engineering | Angular & React Native | TypeScript · Node.js

Colombia, UTC-5 | (+57) 4 3007441143 | jaramillo93@gmail.com | [linkedin.com/in/daniel-jaramillo-bustamante](https://www.linkedin.com/in/daniel-jaramillo-bustamante)

CAREER SUMMARY

Frontend Tech Lead with 9+ years of experience architecting adaptive, scalable front-end solutions and leading engineering teams across technology services, multinational professional services, and residential renewable energy industries. Deep expertise in Angular, TypeScript, and Node.js/Express, with hands-on production delivery of micro-frontend architectures (Nx, Native Federation) and reusable design system component libraries. Pioneered the adoption of AI-native development workflows within a production engineering team — integrating Claude CLI, Claude Design, and MCP (Model Context Protocol) environments into daily implementation, MVP scoping, and code-quality practices. Currently deepening hands-on experience with AI SDKs (streaming, tool-calling, agentic workflows) and accessibility engineering to extend this practice beyond a single team. Passionate about applying AI-augmented engineering to multiply team output without sacrificing code quality.

SUMMARY OF QUALIFICATIONS

Languages: JavaScript, Advanced; TypeScript, Advanced; Node.js, Advanced; Python, Basic.

AI-Native Engineering: Claude CLI, Medium-Advanced (production adoption); Claude Design, Medium; MCP (Model Context Protocol) environments, Medium-Advanced; AI-assisted implementation, testing & code review workflows, Medium; AI SDK integration (streaming, tool-calling), In progress.

Frontend Frameworks: Angular, Advanced; React Native, Advanced; React, Working knowledge (building production-level depth); Electron JS, Medium.

Frontend Architecture & Design Systems: Micro-frontends (Nx, Native Federation), Medium-Advanced; Reusable component / design system libraries, Advanced; RxJS, Advanced; Signals, Medium-Advanced; CSR, Advanced; SSR, Medium; Accessibility (a11y), Working knowledge, actively deepening.

Backend & Cloud: Node.js, Advanced; Express, Advanced (production APIs); AWS Cloud (Lambda, S3, API Gateway, CodeCommit, RDS, SQS), Medium.

Quality, Testing & CI/CD: Git, Advanced; GitHub, Advanced; GitHub Actions, Medium-Advanced; SonarQube, Medium; Husky, Medium; Jest, Medium; Unit Testing, Medium; Lighthouse, Medium.

Languages (spoken): English, B2; Spanish, Native.

EXPERIENCE

HOME POWER COLOMBIA — Frontend Tech Lead — Nov 2024 – Sept 2026

- Pioneered the adoption of AI-native development workflows within the engineering team, integrating Claude CLI and Claude Design within MCP environments to streamline MVP scoping and implementation, giving stakeholders clear visibility into upcoming development based on the existing component library.
- Led a front-end team of 7 developers, defining Angular architecture standards and coding best practices to ensure scalable, maintainable, and adaptive front-end solutions.
- Designed and built a corporate design system component library, reaching 60% adoption in production and significantly reducing UI development time through reuse.
- Standardized automated quality gates (SonarQube, Husky) within CI/CD, prioritizing and pre-validating issues before they reached QA — compounding the team's AI-assisted and automated review practices.
- Engineered CI/CD pipelines for mobile app delivery to QA (TestFlight), cutting manual handoff effort by 90% and accelerating release cycles.

Tech Stack: Angular, React Native, Claude CLI, Claude Design, MCP, Tailwind, Native Federation, Signals, RxJS, CSR, Nx, Node.js, Express, SASS, AWS (S3, API Gateway, Lambda, CodeCommit), GitHub Actions, Git, Jest, Unit Testing.

Globant — Web UI Developer Ssr — March 2022 – Nov 2024

- Maintained and enhanced legacy Angular codebases while delivering new features to enterprise client platforms, ensuring adaptability and long-term maintainability.
- Applied industry-standard development and deployment methodologies to strengthen efficiency and code integrity throughout all release cycles.
- Consistently met sprint objectives and delivered changes within committed timelines.
- Facilitated communication between technical and process teams to improve product design and development outcomes.

Tech Stack: Angular, Kendo, Node.js, SASS, AWS (S3, API, Lambda, CodeCommit), Dynamics 365, Git, Unit Testing.

ARUS — Automation Analyst — March 2017 – 2022

- Delivered robust, adaptive web platforms that expanded client access to business-critical information, supporting service desks for roughly 30% of the organization's client base.
- Operationalized 50% of the organization's AI algorithms by integrating them into intuitive web interfaces, driving measurable ROI — early hands-on exposure to applying AI/ML outputs in production interfaces.
- Applied industry-leading technical practices and led cross-functional collaboration sessions across diverse teams.
- Facilitated seamless communication between technical and process teams to drive product design improvements.

Tech Stack: *Electron, Angular, Node.js, AWS (S3, API, Lambda, CodeCommit), MySQL, MongoDB, Git.*

EDUCATION

Politécnico Grancolombiano – Medellín, Antioquia

Software Engineer, Last Cycle (July 2021 – Present)

COURSES AND CERTIFICATIONS

- Udemy – JavaScript Master, 2020
- Udemy – Web Development Angular, 2022
- LinkedIn Learning – GitHub for Developers, 2022
- Udemy – PowerApps Complete Guide, 2022
- Platzi – Reactive Programming with RxJS, 2023
- Platzi – Basic Course on Web Components with JavaScript, 2023
